

Security Systems, Inc.

N.M. Contractor's License #27136

Subscriber Secure Internet Services

A reference for alarm owners

What are Subscriber Secure Internet Services?

Subscriber Secure Internet Services allow you to place accounts on test, make temporary changes to party information, view history, view account data and conveniently request account information changes from your dealer.

All information exchanges through these services are secured by the same encryption process used for internet financial transactions.

How do I access these services?

- 1) Visit <http://www.thealarmstore.com/customer>
- 2) Enter your Account Number, Internet Access Code, & Primary Phone Number.
- 3) You will be sent to a main menu where you can place your account on test, make temporary changes to party information, view history, view your account data & conveniently request account changes from your dealer.

What do I do if I have questions?

Please contact us at TAS Security Systems, Inc if you have any questions about using Subscriber Secure Internet Services, Toll Free 800-252-7660 or email Support@TheAlarmStore.com
